

Holding clamp DVN

The installation-friendly insulation clamp

Pressure-resistant insulation boards on timber constructions

Pressure-resistant insulation boards on ceiling undersides

Applications

- To fix pressure-resistant insulation materials (e.g. polystyrene, PU panels, glass foam boards) onto timber sub-structures, predominantly in the ceiling area

Advantages

- The holding clamp DVN allows for a hidden installation for a homogeneous surface.
- The complete fixing system, comprising the clamp and zinc-plated nails, allows for an immediate installation in line with

- building requirements.
- The Sendzimir-galvanised steel claw allows for durable use for the secure anchoring of pressure-resistant insulation materials.
